DECT Base Station Antenna 1920-1980 MHz

## DESCRIPTION

station antenna conceived for DECT system. The radiant element is a PTFE PCB to guarantee high power and low losses and it is protected by ASA radome. It's supplied with an aluminium bracket for an easy installation on the mast. The antenna is made of 6 separate sectors covering 60° each. When both sectors work in the same time they can cover 360° horizontal.
